

Galewind
SOFTWARE

YOUR PARTNER
IN ONLINE CASINO
TECHNOLOGY
WINTER 2012

GALEWIND INTRODUCTION

Galewind Software Corp. is a “User Friendly” Engineering and Design company, incorporated in September 2007 with headquarters in Vancouver, BC, Canada. We manufacture a suite of Casino software gaming products for the online gambling industry.

The experience of our staff of IT technologists, game designers and graphics artists is both broad and deep. We have the resources to plug our products into your existing gambling infrastructure. You simply enjoy the financial benefits, and the excitement, of operating an online casino.

Although technology is required to enter the arena, competing in that arena is all about obtaining and, most importantly, retaining customer trust. Our experience defines trust as a 3-legged stool—Quality, Reliability and Integrity. ❖

GALEWIND QUALITY

Galewind Software brings to your company an assortment of casino products that already have a long term (8 years of online operation) and well-established reputation for exceptional product quality.

Indeed, many of our games (Blackjack, Video Pokers, Stud Poker, etc.) have been described by both players and review forums as “the best on the internet”.

For those of your guests or members who don’t already know Galewind Software, our superior product quality immediately becomes evident through our Practice (aka “Play-for-Free”) Casino.

Our attention to detail in the game graphics and animation, our context-sensitive and comprehensive Help system, and our ease-of-use design provide your visitors with a friendly and exciting first impression. ❖

GALEWIND RELIABILITY

Galewind Software brings to your company a casino that has already established a World Class reputation for product reliability. We have demonstrated 8 years of 24/7/365 up-time server application dependability.

For the Player, all aspects of our product are designed for ease-of-use, with functionality that is intuitive rather than intrusive.

Our process of Continuous Improvement, rigorously applied over the past 8 years of online operation, has resulted in a problem-free, self-maintaining family of products. All of this ensures that your customer's experience in any and all of our products is truly, and continuously, flawless. ❖

GALEWIND INTEGRITY

Galewind Software brings to your company a First-in-Class reputation for business integrity. Our level of transparency in providing your customers with product performance details is unprecedented.

We provide detailed monthly game performance reports through Certified Fair Gambling (CFG). We have internationally recognized Quality System and Random Number Generator Certifications with the Alderney Gambling Control Commission (AGCC) and with iTech Labs.

The integrity of Galewind Software's games, products and corporation is absolutely unquestionable, and unshakeable. ❖
